A VERY BUSY SPRING

Spring flowers and the freshness of spring gave way to the song of the cicadas and the sun of the south of France to light up our season at SICA Nucléaire.

Like every year, we relaunched our vegetable garden to share even fresher products during our monthly meetings.

It is in this calm and rejuvenating setting that we have the pleasure of welcoming you during our training sessions!

Multitask employee

PORTRAIT OF THE QUARTER

The team is growing, missions too...

Nellie just arrived at SICA Nucléaire to help us with the various, multiple, different and daily tasks occurring in the company. She contributes to improving the efficiency of our organization and shares with us her « joie de vivre », an essential quality in our society.

Welcome Nellie!

NEWS

In addition to the many Working Groups and seminars organized by GIFEN, in which SICA Nucléaire takes part, we were present this quarter:

MAY:

- At the celebration of the 10th anniversary of the CNAM University Nuclear Engineering branch with whom SICA Nucléaire has been collaborating for more than a year.

JUNE:

- At the "Perspectives France" event organized by GIFEN. Two very dynamic days during which information received from the Main Clients, as well as during discussions in between industrials have confirmed the good direction taken by SICA Nucléaire (responsiveness, competence, availability, ...)
- At the EPR2 Makers day, organized by EDF and GIFEN

UTO SUPPLIER QUALIFICATION FOR GQAS 2021

SICA Nucléaire is currently supporting a company in the south of France to obtain the UTO certification according to ISO 19443 and the GQAS 2021 supplement:

- Assistance in the implementation of the quality management system (Nuclear QMS) meeting the nuclear requirements (ISO 19443 + SGAQ 2021 supplement)
- Identification, justification and implementation of AIPs/QRAs,
- Update of the Specific Quality Assurance Plan,
- Update of all quality documents (Reference File, Follow Up Document, End Of Manufacturing Report, manufacturing operating methods, internal procedures).

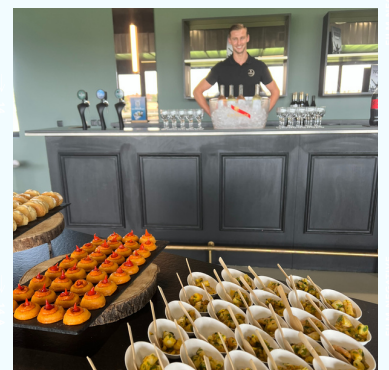

TECHNICAL DAY

It is at the Maurice David Stadium, the Pro D2 match stadium of the Aix Provence Rugby team, that we held a technical day, accompanied by our customers.

This day has been the opportunity to exchange about their expectations and needs, our feedback concerning RCC-E and ISO 19443 standard, to introduce to our new employees and to inform of our future projects.

Special mention to our chef Maxime and his team of **L'Atelier des Gourmands** who gave us, once again, please with a beautiful and good buffet.

Conviviality and good humor were at the rendez-vous!

SUPPORT TO EQUIPMENT QUALIFICATION

SICA Nucléaire help a company in the South-East of France, about management of nuclear quality documents, specially through the following:

- Draft of qualification summary report (QSR) on K1/K2 and K3, qualified products
- Update and evolution of quality documents such as AIP/QRA list, Follow Up Document and Reference File.

BUSINESS MANAGEMENT AND MATERIAL AND SOFTWARE QUALIFICATION

SICA Nucléaire is currently supporting a company in nuclear project management:

- Software qualification management,
- Equipment qualification management,
- Nuclear Control Command cabinet renovation projects.
