Engineer

PROFILE OF QUARTER

For this quarter, we would like to highlight Thomas.

Quality engineer and auditor for the past 2 years at SICA Nucléaire, we can now count him as a qualified inspector and auditor in our team.

Congrats !

TECHNICAL POINT : PEDAGOGICAL ENGINEERING

Thanks to our in-house skills, we create training materials, customised e-learning modules and educational games to meet our clients' needs. These materials are built according to your specifications in order to meet your expectations as closely as possible.

We are currently finalising a project:

LAUNCHING OF RCC-E THE GAME

(accredited by **afcen**)

It is a game based on the well-known "Trivial Pursuit", adapted to the RCC-E code. By offering this game to its employees, management provides them with a simple and fun way to refresh and update their knowledge of the requirements outlined in the RCC-E 2019. Fully legitimised by questions and answers from the RCC-E itself, the game is a comprehensive learning method that is easily adopted by players.

TROPHÉE ROSES DES SABLES

Je vais le faire !

Since the beginning of the year 2000, Désertours has been proposing a 100% women's rally in Morocco to women looking for a meaningful experience :

TROPHÉE ROSES DES SABLES

For this 20th edition of the Rally-Raid, we are happy to support the team "La Minute Rose des Sables", composed of Delphine LAGRUE, notary in Luçon (85), driver and Christel ROY, notary in Airvault (79) co-driver. These pilots will have to cover 5000 kilometres to reach the gates of the Moroccan desert in 4x4, SSV, quads and motorbikes.

The Trophée Roses des Sables supports various causes to which women are particularly sensitive. The Roses work directly for five associations :

- [Enfants du Désert](#)
- [La Croix-Rouge](#)
- [Ruban Rose](#)
- [Breakfast Club of Canada - Club des Petits Déjeuners](#)
- [Fondation GoodPlanet](#)

Delphine and Christel will take 50 kgs of medical equipment and 10 kgs of food that they will give to the Croix-Rouge during the different stages.

A great adventure to follow from **12 to 23 October 2021 !**

TEAM BUILDING

In order to consolidate team cohesion, reveal talents and personalities, and build closer ties between managers and employees, we organised a team building event.

Marc NEVCHEHERLIAN, director of SICA Nucléaire, welcomed us with a day full of games and activities: Laser Game, petanque, Ping Pong, Molki... All this was accompanied by a good meal.

NEWS

NOUS AVONS LE PLAISIR DE VOUS RETROUVER AU WORLD NUCLEAR EXHIBITION

30 / 11 / 21 - 02 / 12 / 21

Stand n°33 | Allée D | Hall 7 | Paris Nord Villepinte

E-LEARNING

Finalization in September 2021 of project design and development:

Creation of 2 e-learning modules on **the RCC-E 2012 discovery**. In French and English versions.

SUMMER JOB

To continue our digitalisation process, this summer we hired Hugo, a former intern who continued the development of the VR module, and Tommy who created an application for the material management of the company.
